

TEOLER HIGH SCHOOL

IPMAT FOUNDATION REVIEW TEST – 06 (SET – A)

Session: 2026 – 27

Grade – X

Time Allowed: 100 Minutes

Maximum Marks: 360

Instructions:

- (i) There are 90 questions in total.
 - (ii) Each question carries 4 marks.
 - (iii) There is Negative Marking.
 - (iv) One Mark will be deducted for each incorrect answer.
-

VERBAL ABILITY

Directions (1 to 6): Read the passage and answer the questions that follow:

The Architecture of Persuasion: Modern Political Campaigns

The hybrid nature of modern political outreach.

[1] The modern political campaign is often characterized as a sleek, data-driven machine, powered by algorithms and micro-targeting. In this narrative, the 'political genre' of communication has shifted from the town square to the digital interface, where voter behavior is predicted with mathematical precision. However, a holistic analysis of campaign finance and strategy suggests a more complex reality. While the 'fourth era' of campaigning—defined by digital sophistication—is undeniably present, it has not yet supplanted the traditional methods of the past. Instead, modern campaigns are best understood as 'assemblages': a hybrid of cutting-edge data analytics and the persistent, physical presence of unsolicited mailers.

[2] The 2024 United Kingdom General Election serves as a definitive case study for this phenomenon. According to data from the Electoral Commission (2024), total campaign spending reached a record high of £94.5 million. This surge was partially facilitated by the UK Government's decision in November 2023 to increase national spending limits in line with inflation—the first such adjustment since the limits were established in 2000. Despite the technological allure of social media advertising and digital influence, the largest single category of expenditure remained 'unsolicited materials to electors.' At £26 million, the spend on physical leaflets and direct mail significantly outpaced the £19.7 million dedicated to advertising, which includes digital platforms.

[3] This dominance of physical media challenges the popular conception that digital campaigning is the primary engine of modern politics. The persistence of the unsolicited mailer suggests that political parties still view the tangible, physical arrival of a message in a voter's home as a uniquely powerful tool of persuasion. In the political genre, the physical leaflet serves a specific rhetorical function: it provides a sense of permanence and local presence that a fleeting digital ad cannot replicate. It is a 'push' medium that requires the recipient to physically handle the party's branding, even if only to discard it. This physical interaction remains a cornerstone of the architecture of persuasion.

[4] However, the record-breaking £94.5 million total spend—a significant increase from the £39.7 million spent in 2001—indicates that the scale of persuasion has expanded. While only the Labour and Conservative parties spent 70% or more of their allowed limits, the overall trajectory of spending is upward. This financial escalation is not merely a product of inflation; it reflects the increasing cost of maintaining a multi-front campaign. Parties must now invest in 'canvassing and research' (£6.7 million in 2024) to fuel their data-driven operations while simultaneously funding the massive logistical undertaking of printing and distributing millions of physical leaflets.

[5] The shift towards data-driven operations is most evident in how parties prioritize their research. Modern campaigns collect extensive data to deploy targeted messages, attempting to maximize support by speaking directly to the specific concerns of narrow voter segments. Yet, research published in *Government and Opposition* (Cambridge Core) argues that focusing exclusively on these novel practices offers a 'distorted picture.' Their analysis of expenditure items reveals that while data-driven techniques are evident, they are a supplement to, rather than a replacement for, existing practices. The modern campaign is an entwined blend of different eras, where a data-derived insight might ultimately be delivered to a voter via a traditional, hand-delivered flyer.

[6] Interestingly, the role of Non-Party Campaigners (NPCs) has seen a recent decline, with spending dropping to £2.6 million in 2024 from a peak of £6.2 million in 2019. This suggests a consolidation of the political genre around the primary parties, who remain the chief architects of electoral persuasion. As campaigning techniques continue to evolve, the Electoral Commission has called for a revision of spending categories to better reflect the rise of digital campaigning. The current categories, set in 2001, may no longer provide electors with a sufficiently granular understanding of how their perceptions are being managed.

[7] Ultimately, the architecture of modern persuasion is not a choice between the old and the new, but a strategic integration of both. The record spending of 2024 underscores the high stakes of this influence, where millions of pounds are deployed to navigate the intersection of data science and traditional outreach. To understand the modern political campaign is to recognize that while the tools of research have become more scientific, the primary vehicle for reaching the voter's mind often remains the humble, unsolicited letter.

1. Which of the following best captures the author's primary thesis regarding the nature of modern political campaigns?
 - (1) Political persuasion has become a purely scientific endeavor, rendering the 'political genre' of town square communication obsolete.
 - (2) Modern campaigns are best defined as 'assemblages' that strategically integrate digital data analytics with traditional physical outreach.
 - (3) The 'fourth era' of campaigning has successfully supplanted traditional methods due to the mathematical precision of micro-targeting.
 - (4) The record-breaking spending in 2024 is primarily a result of the UK Government's decision to increase spending limits rather than a shift in strategy.

2. According to the passage, what specific rhetorical function does 'unsolicited material' serve that distinguishes it from digital advertising?
 - (1) It provides a sense of permanence and physical interaction that digital interfaces cannot replicate.
 - (2) It allows for more precise micro-targeting of narrow voter segments than social media platforms.
 - (3) It eliminates the need for 'canvassing and research' by delivering a broad, non-targeted message.
 - (4) It is a more cost-effective method of persuasion, as evidenced by the lower total spend compared to advertising.
3. What can be inferred from the spending data of the 2024 UK General Election regarding the behavior of the major political parties?
 - (1) The decline in NPC spending indicates that major parties no longer value the influence of third-party campaigners.
 - (2) The increase in spending limits led all registered parties to spend at least 70% of their allowed maximums.
 - (3) Political parties have largely abandoned traditional canvassing in favor of unsolicited direct mail to save on labor costs.
 - (4) The major parties are increasingly focused on a multi-front strategy that requires high capital investment across both logistical and analytical domains.
4. In paragraph [5], the author cites research from Government and Opposition to support which of the following claims?
 - (1) The 'fourth era' of campaigning is a myth, as most parties still rely entirely on 20th-century outreach methods.
 - (2) Hand-delivered flyers are the most effective way to communicate data-derived insights to narrow voter segments.
 - (3) Focusing exclusively on novel, data-driven practices results in a distorted understanding of how modern campaigns actually function.
 - (4) Data-driven techniques have become the dominant force in UK elections, accounting for over 50% of all expenditure items.
5. Based on the 'political genre' of writing discussed in the text, what is the author's tone toward the current Electoral Commission spending categories?
 - (1) Dismissive, arguing that spending categories are irrelevant in an era of decentralized digital influence.
 - (2) Critical and reform-oriented, suggesting the categories are outdated and fail to provide necessary transparency for voters.
 - (3) Neutral, merely reporting the Commission's findings without commenting on the efficacy of the current system.
 - (4) Satisfied, noting that the 2001 categories have successfully captured the rise of the 'fourth era' of campaigning.
6. Which of the following best describes the 'architecture of persuasion' as it is presented in the concluding paragraph?
 - (1) A system where the rise of digital campaigning has forced parties to spend record amounts to maintain their local presence.
 - (2) A transitional phase where traditional letters are being phased out in favor of more cost-effective digital data science.
 - (3) A conflict between the 'old' and the 'new' that has resulted in a significant decrease in the effectiveness of political messaging.
 - (4) A strategic integration of scientific research tools and traditional outreach vehicles to navigate high-stakes influence.

Directions (7 to 11): Fill the blanks with the appropriate idioms:

7. Although the manager knew that the project was in serious trouble, he refused to take responsibility and kept avoiding the main issue. Everyone felt that he was _____.
- (1) calling a spade a spade (2) beating around the bush
(3) taking the bull by the horns (4) making a clean breast of it
8. The two neighbouring families have been _____ for years, constantly arguing over even the smallest matters.
- (1) sitting on the fence (2) keeping their fingers crossed
(3) at daggers drawn (4) in the nick of time
9. The police searched every corner of the building to find the missing documents. They _____ to recover the evidence.
- (1) played ducks and drakes (2) barked up the wrong tree
(3) left no stone unturned (4) crossed their t's and dotted their i's
10. Riya was extremely nervous before her solo performance and kept walking up and down backstage.
- (1) like a cat on hot bricks (2) at arm's length (3) in cold blood (4) by fits and starts
11. The journalist carefully examined the minister's statement and understood the criticism hidden within his apparently positive remarks. She knew how to _____.
- (1) take the bull by the horns (2) feather her own nest
(3) read between the lines (4) come off with flying colours

Directions (12 to 16): Fill the blanks with appropriate word:

12. The therapist's gentle, open-ended questions were designed to _____ honest feelings from patients who were otherwise reluctant to share.
- (1) suppress (2) fabricate (3) elicit (4) dismiss
13. As the morning sun grew stronger, the thick fog over the valley began to _____, revealing the outline of the hills below.
- (1) intensify (2) dissipate (3) accumulate (4) solidify
14. Despite having an entire month to finish the project, Vikram was such a _____ that he didn't start until the night before the deadline.
- (1) sluggard (2) prodigy (3) mentor (4) visionary
15. When reporters asked the senator directly whether she would support the bill, her _____ response left everyone guessing about her true position, as she seemed to agree and disagree at the same time.
- (1) resolute (2) equivocal (3) candid (4) emphatic
16. After reviewing all the evidence independently, both detectives were quick to _____ with each other's conclusions, confirming that the suspect had a solid alibi.
- (1) dissent (2) hesitate (3) deliberate (4) concur

Directions (17 to 20): Select the most appropriate mania/phobia:

17. Whenever Meera visited the city, the sight of towering skyscrapers, massive bridges, and huge monuments filled her with intense, irrational dread, even though she knew they posed no real danger to her. Her extreme fear of very large objects and structures is an example of _____.
- (1) Claustrophobia (2) Megalophobia (3) Bibliophobia (4) Insomnia
18. After moving into her new house, she found herself increasingly unable to stay indoors, gripped by an intense, irrational fear whenever she was inside any home, eventually forcing her to sleep in her car. Her irrational fear of being inside a house is an example of _____.
- (1) Domatophobia (2) Arachnophobia (3) Agoraphobia (4) Acrophobia
19. Despite multiple doctors confirming he was perfectly healthy, the man remained convinced he was suffering from a serious undiagnosed illness, constantly researching symptoms and demanding new tests. His excessive and persistent worry about having a serious illness, despite medical reassurance, is an example of _____.
- (1) Kleptomania (2) Pyromania (3) Hypochondria (4) Amnesia
20. After a swarm of locusts invaded her family's farm when she was young, Meera developed an intense, irrational fear whenever she saw even a single ant or beetle, often refusing to enter gardens or parks. Her condition is an example of _____.
- (1) Claustrophobia (2) Acrophobia (3) Agoraphobia (4) Entomophobia

Directions (21 to 25): Fill the blanks with appropriate word:

21. The doctor was concerned when the patient was found wandering through the house in a _____ state, seemingly unaware of his surroundings.
- (1) euphoric (2) somnambulistic (3) alert (4) deliberate
22. After several disagreements among the team members, the manager adopted an _____ tone, offering guidance and support like a caring uncle.
- (1) avuncular (2) hostile (3) dismissive (4) confrontational
23. After months of uncertainty about whether to accept the overseas assignment, Riya remained _____ about leaving her family and pursuing the opportunity.
- (1) ambivalent (2) enthusiastic (3) resolute (4) certain
24. After months of neglect and poor maintenance, the condition of the once-grand building had become _____, with cracked walls, broken windows, and a leaking roof.
- (1) magnificent (2) ordinary (3) abysmal (4) impressive
25. After years of formal training, the celebrated artist dismissed the self-taught painter as a mere _____, lacking professional expertise and discipline.
- (1) virtuoso (2) dilettante (3) connoisseur (4) maestro

QUANTITATIVE APTITUDE

26. If the 6-digit number $42573k$ is divisible by 72, then what is the value of the digit k ?
- (1) 4 (2) 5 (3) 6 (4) 7
27. How many numbers between 200 and 800 (exclusive) are divisible by both 5 and 7?
- (1) 16 (2) 17 (3) 35 (4) 18
28. Find the remainder when 7^{101} is divided by 25.
- (1) 7 (2) 1 (3) 24 (4) 18
29. Find the number of trailing zeros in $100! + 200!$.
- (1) 24 (2) 49 (3) 73 (4) 25
30. Find the value of $\sqrt{\left(12 + \sqrt{\left(12 + \sqrt{\left(12 + \dots + \infty\right)}\right)}\right)}$.
- (1) 3 (2) 4 (3) 6 (4) 12
31. Simplify: $\left(1 - \frac{1}{3}\right)\left(1 - \frac{1}{4}\right)\left(1 - \frac{1}{5}\right) \dots \left(1 - \frac{1}{n}\right)$.
- (1) $\frac{1}{n}$ (2) $\frac{2}{n}$ (3) $\frac{2(n-1)}{n}$ (4) $\frac{2}{n(n+1)}$
32. If $x + \frac{1}{x} = 3$, find the value of $x^3 + \frac{1}{x^3}$.
- (1) 27 (2) 18 (3) 36 (4) 24
33. Find the sum of the series: $\frac{1}{(1 \times 2)} + \frac{1}{(2 \times 3)} + \frac{1}{(3 \times 4)} + \dots + \frac{1}{(99 \times 100)}$.
- (1) $\frac{99}{100}$ (2) $\frac{1}{100}$ (3) $\frac{100}{99}$ (4) $\frac{98}{99}$
34. If $a + b + c = 0$, find the value of $\left(\frac{a^2}{bc}\right) + \left(\frac{b^2}{ca}\right) + \left(\frac{c^2}{ab}\right)$.
- (1) 0 (2) 1 (3) 3 (4) -1
35. If the price of petrol increases by 25%, by what percentage must a motorist reduce consumption so that expenditure remains unchanged?
- (1) 20% (2) 25% (3) 15% (4) 16.66%
36. Fresh fruit contains 68% water and dry fruit contains 20% water. How much dry fruit can be obtained from 100 kg of fresh fruits?
- (1) 32 kg (2) 40 kg (3) 52 kg (4) 80 kg
37. Population of a town increases by 10% in the 1st year, decreases by 10% in the 2nd year, and increases by 20% in the 3rd year. If present population is 1,00,000, what will be the population after 3 years?
- (1) 1,18,800 (2) 1,20,000 (3) 1,15,600 (4) 1,17,800

38. A salesman gets 12% commission on total sales and a bonus of 1% on sales over Rs. 15,000. If his total earning is Rs. 3,750, find his total sales.
- (1) Rs. 28,000 (2) Rs. 30,000 (3) Rs. 32,000 (4) Rs. 35,000
39. By selling an article for Rs. 720, a man loses 10%. At what price should he sell it to gain 20%?
- (1) Rs. 900 (2) Rs. 960 (3) Rs. 840 (4) Rs. 1,000
40. Cost price of 15 articles is equal to the selling price of 12 articles. Find the profit percentage.
- (1) 20% (2) 25% (3) 30% (4) 15%
41. A person bought two items for Rs. 12,000 in total. He sold the first at 20% loss and the second at 20% profit. If the selling prices of both items are equal, find the cost price of the item sold at a loss.
- (1) Rs. 7,200 (2) Rs. 4,800 (2) Rs. 6,000 (4) Rs. 7,500
42. If the roots of the equation $x^2 - px + q = 0$ differ by 1, then which of the following is true?
- (1) $p^2 = 4q + 1$ (2) $p^2 = 4q - 1$ (3) $q^2 = 4p + 1$ (4) $p^2 = 2q + 1$
43. Solve for x and y : $3x + 4y = 25$ and $4x + 3y = 24$. What is the value of $x + y$?
- (1) 7 (2) 8 (3) 9 (4) 6
44. If α and β are roots of $x^2 - 6x + 1 = 0$, find the value of $(\alpha^3 + \beta^3)$.
- (1) 198 (2) 216 (3) 180 (4) 204
45. Find the range of ' k ' for which the equation $x^2 - 2(k - 1)x + (k + 5) = 0$ has real and distinct roots.
- (1) $k < -1$ or $k > 4$ (2) $-1 < k < 4$ (3) $k < -4$ or $k > 1$ (4) $k > 4$ only
46. If $\tan \theta + \cot \theta = 2$, find the value of $\tan^{10} \theta + \cot^{10} \theta$.
- (1) 1 (2) 2 (3) 4 (4) None of these
47. From the top of a 60 m high tower, the angle of depression of an object on the ground is 30 degrees. How far is the object from the base of the tower?
- (1) 60 meters (2) $60\sqrt{3}$ meters (3) $20\sqrt{3}$ meters (4) 120 meters
48. Simplify: $\frac{(\sin^4 \theta - \cos^4 \theta)}{(\sin^2 \theta - \cos^2 \theta)}$.
- (1) 0 (2) 1 (3) 2 (4) 3
49. If $\tan \theta + \sec \theta = 5$, find the value of $\sin \theta$.
- (1) $\frac{5}{13}$ (2) $\frac{12}{13}$ (3) $\frac{12}{5}$ (4) $\frac{5}{26}$
50. Two vertical poles of equal heights stand on either side of a road 100 m wide. At a point on the road between the poles, the angles of elevation of the tops of the poles are 60° and 30° . Find the height of each pole.
- (1) $25\sqrt{3}$ m (2) 50 m (3) $20\sqrt{3}$ m (4) $30\sqrt{3}$ m

LOGICAL REASONING

Directions (51 to 54): In the following series, replace the question mark (?) with the suitable option.

51. 2, 6, 12, 20, 30, ?

- (1) 36 (2) 40 (3) 42 (4) 44

52. 3, 9, 27, 81, ?

- (1) 108 (2) 162 (3) 243 (4) 324

53. 1, 2, 6, 24, 120, ?

- (1) 600 (2) 720 (3) 840 (4) 1000

54. 3, 6, 11, 18, 27, ?

- (1) 36 (2) 37 (3) 38 (4) 39

Directions (55 to 57): Find out the missing number in the given figure.

55.

- (1) 35 (2) 36 (3) 45 (4) 47

56.

- (1) 127 (2) 142 (3) 158 (4) 188

57.

- (1) 678 (2) 769 (3) 824 (4) 937

Direction (58 and 59): A cube is painted blue on all faces and is then cut into 125 cubes of equal size.

Answer the following questions based on this statement.

58. How many cubes are not painted on any face?

- (1) 8 (2) 16 (3) 27 (4) 36

59. How many cubes are painted on one face only?

- (1) 16 (2) 32 (3) 48 (4) 54

Direction (60 and 61): A cube is coloured red on all faces. It is cut into 64 smaller cubes of equal size.

Now, answer the following questions based on this statement:

60. How many cubes have no face coloured?

- (1) 24 (2) 16 (3) 8 (4) None of these

61. How many cubes are there which have only one face coloured?

- (1) 4 (2) 8 (3) 16 (4) 24

62. In a certain code, MENTOR is coded as EMOUPS and OCTAGON as COUBHPO. What is the code for PENCIL?

- (1) EPLICN (2) LINCENP (3) PLICNE (4) EPODJM

63. If ENTRY is coded as 12345 and STEADY as 931785, then how is ENDEAR coded?

- (1) 174189 (2) 128174 (3) 524519 (4) 128983

64. In a certain code language 'ROAM' is written as '5913' and 'DONE' is written as '4962'. How is 'MEAN' written in that code language?

- (1) 5216 (2) 3126 (3) 3216 (4) 9126

65. In a certain code language 'DINE' is written as '1537' and 'WORTH' is written as '\$#96@'. How is 'WITHER' written in that code language?

- (1) \$5@679 (2) \$567@9 (3) \$56@79 (4) \$56@97

66. In a certain code language 'ROPE' is written as '%57\$', 'DOUBT' is written as '35#8★' and 'LIVE' is written as '@24\$'. How is 'TROUBLE' written in that code language?

- (1) ★%5#8@\$ (2) ★%#58@\$ (3) ★%5#8@4 (4) ★%#58\$@

Directions (67 to 70): What will be mirror image of the given figure below?

67. UTZFY6KH

- (1) HK9YƆΣΤΠ (2) ΠΤΣƆYΛ9KH (3) HKθYƆΣΤΠ (4) HKθYƆΣΤΠ

68. AN54WMG3

- (1) 3GMW4ΣNV (2) 3GMW4ΣNV (3) 3GMW4ΣNV (4) 3GMW4ΣNV

- (1)
- (2)
- (3)
- (4)

- (1)
- (2)
- (3)
- (4)

77. Which place shows maximum percentage increase in number of people who visited from 2012 to 2013?
 (1) Taj Mahal (2) Lotus Temple (3) India Gate (4) Both (1) & (2)
78. What is the average number of visitors of Taj Mahal in 2012, Qutub Minar in 2012, Lotus Temple in 2013 and India Gate in 2013?
 (1) 325 (2) 330 (3) 335 (4) 340
79. What is the difference between the total combined visitors of Taj Mahal and India Gate (both years) and the total combined visitors of Qutub Minar and Lotus Temple (both years)?
 (1) 150 (2) 170 (3) 190 (4) 210
80. By what percentage did the number of visitors to Lotus Temple increase from 2012 to 2013?
 (1) 33.33% (2) 40% (3) 50% (4) 66.67%

GENERAL KNOWLEDGE

81. Which of the following Wildlife Sanctuary is not in Chittorgarh?
 (1) Bassi Wildlife Sanctuary (2) Bhainsrorgarh Wildlife Sanctuary
 (3) Jawahar Sagar Wildlife Sanctuary (4) Kesarbagh Wildlife Sanctuary.
82. Shergarh Sanctuary is located in which district
 (1) Bundi (2) Baran (3) Jhalawar (4) Kota
83. Gogelav Conservation Reserve which is famous for 'Chinkaras' is located in which district
 (1) Sikar (2) Pali (3) Nagaur (4) Jalore
84. Which Wildlife Sanctuary was established in the year 2023?
 (1) Darrah Wildlife Sanctuary (2) Dholpur Wildlife Sanctuary
 (3) Ramsagar Wildlife Sanctuary (4) Jaisamand Wildlife Sanctuary.
85. Which Tiger Reserve is spread across Kota, Bundi, Jhalawar and Chitorgarh districts?
 (1) Ramgarh Vishdhari Tiger Reserve (2) Mukundara Hills Tiger Reserve
 (3) Sariska Tiger Reserve (4) Ranthambore Tiger Reserve
86. Which of the following Conservation Reserve is famous for Leopards?
 (1) Sundha mata Conservation Reserve (2) Jawai bandh Conservation Reserve
 (3) Beed Jhunjhunu Conservation Reserve (4) Shakambari Conservation Reserve
87. Rankhar Conservation Reserve is famous for
 (1) Vultures (2) Chinkaras (3) Leopards (4) Wild Ass
88. The newly formed Balotra district in Rajasthan is included in which Administrative Division?
 (1) Ajmer (2) Jodhpur (3) Bikaner (4) Jaipur
89. Which of the following districts is not the part of Udaipur Division?
 (1) Banswara (2) Dungarpur (3) Chittorgarh (4) Sirohi
90. Following the cabinet Reorganization on December 28, 2024. What is the total number of Districts in Rajasthan?
 (1) 33 (2) 41 (3) 50 (4) 53
